SECURITY SCORE MATRIX

Measure, Manage, and Master Cybersecurity

ThreatMon's Security Score Matrix provides a clear, dynamic risk score powered by actionable intelligence and real-time data. By transforming vast amounts of threat information into meaningful insights, it enables organizations to identify vulnerabilities, prioritize threats, and build stronger defenses. This intelligence-driven approach simplifies decision-making, helping security teams focus on what truly matters.

Key Features:

- AI-Powered Risk Scoring
- Comprehensive Intelligence Integration
- Dynamic Updates with Alarm Correlation
- Risk History Tracking

THREATMON AI

Proactive, Predictive, Powerful: Redefining Threat Intelligence

ThreatMon AI revolutionizes threat management with cutting-edge AI capabilities that go beyond detection, providing proactive insights and actionable guidance. Whether acting as a Cybersecurity Search Engine or generating tailored Threat Landscape Summaries for CISOs, ThreatMon AI equips organizations with the tools to mitigate risks, streamline operations, and fortify their defenses.

Key Features:

- Cybersecurity Search Engine
- AI-Driven Support Agent
- AI-Driven Risk Assessment
- Comprehensive Integration

for all intelligence needs.

Redefining Your Cybersecurity with AI-Driven End-to-End Intelligence

ThreatMon transforms cyber defense by combining cutting-edge AI with thorough threat intelligence. From pinpointing weaknesses to reducing dangers, its comprehensive strategy offers practical knowledge that enables organizations to stay ahead of advancing cyber risks. ThreatMon guarantees your defenses stay ahead with instant updates and smart analysis.

Holistic Intelligence

Proactive Security

Scalable for Your Business

Effortless Operation

The ever-changing threat landscape evolves into a more fast-paced environment where threat actors collaborate the most, causing threats to emerge and harm much faster.

Today, it is proven that Businesses of all sizes may suffer from the agility of threat actors.

ATTACK SURFACE INTELLIGENCE

See the weakest chain on your attack surface, from the threat actor's eye

Secure every element of your digital footprint with ThreatMon's Attack Surface Management. Continuously discovering, mapping, and monitoring your organization's digital assets, including those of subsidiaries and technology vendors.

Key Features:

- Asset Discovery & Monitoring
- Security Misconfiguration
- Vulnerability Management
- Mobile App Security
- Reputation Monitoring
- Continuous External Pentesting

FRAUD INTELLIGENCE

Don't let Fraud slip in between you and your customer

The Fraud Intelligence module from ThreatMon is created to tackle the increasing challenge by providing ongoing and thorough monitoring features. It offers actionable insights to prevent attacks.

Key Features:

- Social Media Monitoring
- Phishing Monitoring
- Rogue Mobile App Monitoring
- Stolen Credit Card Monitoring
- Brand Abuse Monitoring

DARK WEB INTELLIGENCE

Let's light the Dark Web up and find out what is targeting you

ThreatMon's Dark Web Intelligence module monitors underground forums and hidden networks to provide actionable insights, identifying compromised data, exposed credentials, and brand mentions to protect your organization.

Key Features:

- Leak Credential Detection
- VIP & Executive Protection
- Blackmarket Monitoring
- Botnet Monitoring
- Underground Posts Monitoring
- Regional & Sectoral Intelligence

CYBER THREAT INTELLIGENCE

Revolutionizing Threat Defense with Big Data Power

Cyber Threat Intelligence is central to ThreatMon's platform, connecting services to give organizations a comprehensive security view. By processing vast data, it ensures every insight strengthens your defense.

Key Features:

- Threat Actor / APT Monitoring
- Real-Time Ransomware Tracking
- Dataset Breach Monitoring
- Dark Web Threat Watch
- Threat Feed / IOC Integration
